OUTLOOK

Our outlook for Organic Net Revenue growth, Adjusted EPS growth on a constant currency basis, Adjusted Interest Expense, Net, Adjusted Effective Tax Rate and Free Cash Flow for full-year 2020 are non-GAAP financial measures that exclude or otherwise adjust for items impacting comparability of financial results such as the impact of changes in currency exchange rates, restructuring activities, acquisitions and divestitures. Because GAAP financial measures on a forward-looking basis are not accessible and reconciling information is not available without unreasonable effort, we have not provided that information with regard to the non-GAAP financial measures in our outlook. We are not able to reconcile our projected Organic Net Revenue growth to our projected reported net revenue growth for full-year 2020 because we are unable to predict during this period the impacts from potential acquisitions or divestitures as well as the impact of currency translation due to the unpredictability of future changes in currency exchange rates, which could be material as a significant portion of our operations are outside the U.S. We are not able to reconcile our projected Adjusted EPS growth on a constant currency basis, Adjusted Interest Expense, Net, and Adjusted Effective Tax Rate to our projected reported diluted EPS growth, reported interest and other expense, net, and reported effective tax rate, respectively, for full-year 2020 due to several factors, which could include: our ability to predict during this period the timing of our restructuring program costs, mark-to-market impacts from commodity and forecasted currency derivative contracts, when interest rate swaps are determined to no longer be designated as accounting cash flow hedges due to changed financing and hedging plans, impacts from potential acquisitions or divestitures as well as the impact of currency translation due to the unpredictability of future changes in currency exchange rates, which could be material as a significant portion of our operations are outside the U.S. We are not able to reconcile our projected Free Cash Flow to our projected net cash from operating activities for full-year 2020 because we are unable to predict during this period the timing and amount of capital expenditures impacting cash flow. Therefore, because of the uncertainty and variability of the nature and amount of future adjustments, which could be significant, we are unable to provide a reconciliation of these measures without unreasonable effort.
